

CABINETS WITH DRAWERS START SERIES

Flexa cabinets with drawers are a versatile and compact solution for organising everything you need for work. They feature a **central cylinder lock** and **drawers with 100% total pull-out** which can have a **load capacity varying between 50 and 70 kg**. The inside of the **drawers** is completely customisable thanks to the possibility of dividing them using **dividers, divider boxes and 5S tool trays**. The upper surface can be left free or protected with a **3-edged PVC surface** to carry out work and operations.

DRAWER LOAD-BEARING CAPACITY FROM 50 TO 70 KG

PERFORATED DRAWERS

BALL BEARINGS

KEY-OPERATED CLOSURE

LOCK

The cylinder lock is connected via a square rod to the rear locking unit consisting of a rotating element in plastic material and a locking rod in sheet steel. Turning the key activates the cam system of the locking unit which rotates the rear rod (A).

3-EDGE TOP SHELF COATED WITH PVC

The PVC-coated 3-edge top protects the upper part of the cabinet and, thanks to the raised edges, prevents the material placed on it from falling off.

FREELY ORGANISABLE

The drawer can be internally divided by means of **partition drawers for small parts and longitudinal and transversal metal dividers**. The latter are fixed to the perforated base of the drawer by means of screws to prevent spillage of the stored material.

PERFORATED DRAWERS

ORGANISATION DOWN TO THE MILLIMETRE
Holes and slots on the drawers make it easier to add internal dividers for optimally arranging tools and materials.
