

STEEL

METAL BOXES AND CONTAINERS

PRO+ SERIES

The **metal boxes and containers** have a solid structure to be able to transport and hold small parts and heavy components. The sides and bottom, in fact, have specific **ribs** which strengthen the entire container and ensure **resistance to intensive use, impacts and heavy loads**. Steel offers small-sized **hopper-type boxes and containers** for organising components on workstations or in the warehouse or **metal storage boxes with opening bottom or large hopper-type containers** for managing waste and semi-finished products.

CONTAINERS WITH OPENABLE BOTTOM WITH ROLLERS

Lifted with a forklift truck through the four handles welded onto the top edge, they can be used to dump material through the openable bottom with rollers (87% opening). They can be opened easily and safely through the lever placed on the 800 mm side, while they can be closed by means of a special device consisting of levers and steel rollers.
